Objective

I am a self-taught fullstack web-developer with the skill set and mindset to help in making a business attain its supposed peak in the current wave of internet based capitalism. This I can do through collaborative effort as a team and as an individual contribution to the common wealth. I love creativity sprinkled with simplicity of Elegance, and I am a great UI/UX enthusiast

Experience

FamilyLove Radio

2018 - 2019

IT personnel

1. Was in charge of managing the official sites of the company
2. I also set up the cloud for the day program
3. General tech guy of the company

Education

Nnamdi Azikiwe University

2013/2017

Philosophy

Pope John Paul II Major Seminary, Awka

2014

Latin Language/Latina Lingua

Projects

Vibers(Social media)

A MERN fullstack project, with both frontend and fetched its data from the API I built in the backend.

Built in current ES6 syntax

PidginBox(Social Messenger)

An app built on MERN stack, with form validation and authentication. Built in current ES6 JavaScript syntax. With great logic and methodology.

Weather App

This app basically follows the logic of CRUD operation, and calls API from a weather API website.
